

Saint Bernard Church

GENERAL CONSTRUCTION

This Project was completed for St. Bernard Church in June of 2017 and consisted of 7200 square feet of tear off and reroof. The old roof was composed of shingles, which were removed along with the existing gutters and discard. We replaced the existing roof with a new Patina Green Sarnifil PVC adhered system with Décor ribs which made the entire building look more lively and aesthetically pleasing.

The shingle roof was replaced with a new Sarnifil PVC system with décor ribs evenly spaced 24" apart. The customer was very pleased with the finished product which was completed on budget and within the timeframe requested.

Blackmore and Buckner is a family run company who has been in the roofing business for over 100 years. They are Gold Circle Safety award winners, A Firestone Master Contractor and A GAF Master Contractor.
